Contributions

Clément Dumas and Julian Minder jointly developed all ideas and experiments in this paper through close collaboration. Both implemented the training code for the crosscoder. Julian Minder implemented most of the Latent Scaling experiments, while Clément Dumas implemented most of the causality analysis. Smaller experiments were equally split between the two. Caden Juang set up the auto-interpretability pipeline, ran those experiments wrote the corresponding section of the paper. Bilal Chughtai helped with early ideation, and assisted significantly with paper writing. Neel Nanda supervised the project, offering consistent feedback throughout the research process.
