

(a) Model fine-tuned using SFT.

(b) Model fine-tuned using LFT.

Figure 12. Frequency distribution plot of top 125 shifted and marginal for LLaMa-2 7B trained on LIMA 1K and inferred on just-eval-instruct 1K. We visualize frequency distributions of models fine-tuned on both SFT and LFT to compare the knowledge learned by both models in the fine-tuning stage.
